

Table 5: Slipway construction

	Relevant Authorities for this activity	Other Competent Authorities	Other associated organisations
Authorities associated with activity	Isle of Wight Council (ICWC); English Nature (EN)		
Location	The activity occurs at most private and public slipways throughout the SWMEMS area in Ventnor, Shanklin and Sandown, the majority of slipways being in the harbours and marinas.		
Frequency	Slipway maintenance is also more likely to be carried out in the summer.		
Potential effects with regards to Reg. 33 advice	<ul style="list-style-type: none"> • Noise • Visual • Changes in turbidity 		
Research undertaken	None		
Research required	Possible research could be the negative effects this activity may have on the environment.		
Ongoing management	<p>The IWC regulates and monitors this activity on council-owned slipways on a regular basis and any problems rectified.</p> <p>Permission is required from EN for any operation likely to damage a SSSI. EN may consent, assist or advise on any operations listed as 'an operation requiring EN's consent (formerly Operations Likely to Damage, OLD). EN is able to prosecute anyone for damage to a SSSI under the CRoW Act 2000. EN is also able to make byelaws for the protection of a European marine site under Regulation 36 of the Conservation Regulations 1994 but this is considered a last resort in the management of this site. 'Construction/alteration of hard standing structures' is cited on the SSSI OLD list where the SSSIs are sensitive to this kind of operation. 'Clearance of boulders, large stones, loose rock and shingle and recharge of the foreshore' is cited on the OLD list where SSSIs are sensitive to this kind of operation. The destruction, displacement, removal or cutting of any lichen plant remains or algae is cited on the OLD list where SSSIs are sensitive to this kind of operation.</p>
